DETAILED ACTION

Allowable Subject Matter

1. Claims 1-42 are allowed.
2. The following is an examiner's statement of reasons for allowance:

With regard to claims 1-12, although the prior art discloses methods comprising the steps of situating a venturi in series in a closed-loop system and providing a predetermined pressure at a throat of the venturi, it fails to teach or fairly suggest the step of providing an accumulator and a valve to cause fluid to be passed to the heat-generating component when the pump is not pumping as claimed in claim 1.

With regard to claims 13-28, although the prior art discloses a cooling system comprising a heat-rejection component, a pump, a conduit comprising a venturi, a closed expansion tank coupled to the conduit, and a valve coupled to the conduit, it fails to teach or fairly suggest that the valve and the closed expansion tank cooperating to cause flow in the conduit to cool the component when the pump is deactivated as claimed in claim 13.

With regard to claims 29-42, although the prior art discloses a x-ray system comprising an x-ray tube situated in an x-ray tube casing, a heat-rejection component coupled to the x-ray tube casing, a pump, a conduit for communicating fluid among the x-ray tube casing, the heat-rejection component, and the pump, and a venturi having a predetermined pressure applied at a throat of the venturi, it fails to teach or fairly suggest that the x-ray system further comprises a closed expansion tank located between the pump and the heat-rejection component, and a valve located between the pump and the closed expansion tank as claimed in claim 29.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
